Hello. If you are a parent in the family courts, there is something important to understand – you are in a situation of Institutional Betrayal (Freyd) from professional psychology, specifically the forensic custody evaluation industry who have captured the American Psychological Association (APA), and which uses the Association of Family and Conciliation Courts (AFCC) to promote their forensic custody evaluation (parenting plan assessments).

Institutional Betrayal

Ethical Violations to Standard 2.01 – Competence

The psychologists in the family courts (and Master's level mental health professionals) are not competent (a violation of Standard 2.01 of the APA Ethics Code (<https://www.apa.org/ethics/code>)) in the following domains:

Attachment Pathology

Delusional Thought Disorders

Family Systems Pathology

If you are a parent in the family courts, you are receiving the worst mental health services imaginable: ignorant (i.e., lacking knowledge and information), unethical (violations to Standards 2.01, 2.04, 9.01, 3.04, 8.01, 5.04), and incompetent (in attachment pathology, delusional thought disorders, and family systems pathology).

Forensic custody evaluations (parenting plan assessments) are “dangerous” and “harmful to children” – they “lack scientific or legal value” – they produce “defective reports” leading to “potentially disastrous consequences for parents and children. (New York Blue-Ribbon Commission on Forensic Custody Evaluations (<https://ocfs.ny.gov/programs/cwcs/assets/docs/Blue-Ribbon-Commission-Report-2022.pdf>), 2022).

From NY Blue Ribbon Commission: “In some custody cases, because of lack of evidence or the inability of parties to pay for expensive challenges of an evaluation, defective reports can thus escape meaningful scrutiny and are often accepted by the court, with potentially disastrous consequences for the parents and children... As it currently exists, the process is fraught with bias, inequity, and a statewide lack of standards, and allows for discrimination and violations of due process.” (p. 4)

From NY Blue Ribbon Commission: “By an 11-9 margin, a majority of Commission members favor elimination of forensic custody evaluations entirely, arguing that these reports are biased and harmful to children and lack scientific or legal value. At worst, evaluations can be dangerous, particularly in situations of domestic violence or child abuse.” (p. 4)

YouTube Consultation

The YouTube Page (<https://drcachildress-consulting.com/youtube/>), of this Consulting Website has selected YouTube seminars that may be of value to parents and professionals:

Diagnostic Series

Contingent Visitation Schedule

Case Vignettes

Sunday Coffee w/ Dr. Childress Facebook Live (and YouTube Channel)

I provide general public consultation the first week of every month at my online office doxy.me/drchildress (<https://doxy.me/drchildress>), scheduling is through my online Scheduling Calendar. (<https://drcachildress-consulting.com/custom-page/scheduling-an-appointment/>). The cost for consultation appointment is \$250/hr and I bill through doxy.me at the start of the hour.

I am licensed in the state of Washington, so there are only limited things I can do for non-Washington residents. Typically, I help parents frame up their situation and possible directions forward with their local area professionals. I am available for professional-to-professional consultation with other mental health professionals and attorneys – just not parents outside my state of licensure.

🔊 Note: I am prevented to provided consultation to attorneys and parents in Oregon by order of sanctions delivered by the Oregon licensing board and advice from the Trust malpractice insurance carrier and my attorney, pending appeal decision of the Oregon licensing board sanctions in the Oregon courts.

Parents may wish to familiarize themselves with the materials on this Consultation website for the mental health professionals and attorneys.

Parent Consultation Handout

This is a handout to attorneys and their client parents explaining a treatment-oriented approach to resolving post-divorce family conflict involving the child.

Healthcare & Legal System Solutions

The allied parent wants to drive this into the courts to put the targeted parent on “trial” for being a “bad parent”/(spouse). Don’t let that happen. This isn’t about custody, it’s about child abuse, it’s about treatment.

In healthcare, all of healthcare, including all of mental health care, diagnosis guides treatment.

The attachment pathology created by the pathological parent is severe, the DSM-5 diagnosis is Child Psychological Abuse (V995.51), the creation of a shared persecutory delusion in the child that then destroys the child’s attachment bond to the other parent.

In all cases of high-intensity custody conflict:

- ☛ A proper risk assessment for possible psychological child abuse needs to be conducted – (DSM-5 V995.51 Child Psychological Abuse).
- ☛ A proper risk assessment for possible spousal emotional and psychological abuse of the targeted parent using the child as the weapon needs to be conducted – (DSM-5 V995.82 Spouse or Partner Abuse, Psychological).
- ☛ A proper assessment for possible delusional thought disorder pathology in the family needs to be conducted.

In healthcare, all of healthcare, including all of mental health care, diagnosis guides treatment.

- ☛ Is the diagnosis V995.51 Child Psychological Abuse?
 - ☛ Is the diagnosis V995.82 Spouse or Partner Abuse, Psychological?
 - ☛ is the diagnosis a shared (induced) persecutory delusion?
